Assessment Services

VIP EVALUATES SOFTWARE DEVELOPMENT LIFECYCLE PROCESSES AGAINST VIP AND INDUSTRY BEST PRACTICES TO HELP CUSTOMERS INCREASE EFFICIENCY AND IMPROVE SOFTWARE QUALITY.

Why choose VIP for your Assessment

Visionary Integration Professionals (VIP) offers business and technology assessments to help clients understand and optimize their organization's performance. By leveraging our extensive industry experience, you can confidently accelerate positive change within your organization. The benefits of choosing VIP for your assessment include:

- Thought leadership and specialized experience delivered by formal practices
- Proven process, best practices, and a well-documented history of success
- Flexible and tool agnostic approach tailored for each client
- Competitive rates with available fixed package pricing

VIP offers a diverse solution portfolio that allows organizations to better align strategy to execution. Hundreds of organizations have leveraged VIP services to make the right business improvements, optimize processes, instill governance, ensure security, build future leaders and capitalize on success. VIP assessments are specialized into several of our core disciplines. We have developed proprietary assessment procedures for

- Software Quality Management
- Organizational Development
- Agile Methodology
- DevOps Lifecycle Management
- Project and Portfolio Management

Our Approach

The VIP approach begins with us listening to you. Sitting across from you and hearing about your current state and where you would like it to be. We collaborate with you and come to an agreement on the goals and targets of the Assessment(s). We then begin the information gathering phase which is designed to gain a clear, detailed understanding of your business and technology processes. To accomplish this, we combine the practice of reviewing related documentation, project artifacts and meetings/discussions/interviews with delivery personnel. This allows us to truly understand the current environment, and establish a baseline for all recommendations. A typical assessment project includes:

- **Process Assessment** – Determine if business practices are documented, regulatory compliant, risk avoidant, and efficient. Identify key metrics and goals that can be used to guide practices.
- **Project Implementation Assessment** – Past projects are reviewed to determine compliance with defined processes and project success.
- **Tool Assessment** – Review and assess how project tools are being utilized. The goal is to increase efficiency, adoption, communication, and control with the proper implementation of the right tools. All VIP assessments are vendor neutral and technology agnostic.
- **People Assessment** - Interview and assess select team members for skills and aptitude. As a result of the interviews, provide recommendations for training and skills development.

Each assessment project includes a set of key deliverables. While the deliverables are uniquely defined for each client, they include:

- **Executive Summary** - Key findings and recommendations including estimated effort, sequencing, and criticality. This will include a prioritized list of recommendations.
- **Current State** - Document the current state of the organization, infrastructure and processes. The intent is to establish a baseline from which to evolve.
- **Detailed Findings** - Specific findings including near term tactical and long term technical, organizational, discipline and process recommendations.
- **High-level Implementation Roadmap** - High level implementation plan based on the proposed recommendations and strategic needs of the client. The initiatives that are the components of the Roadmap are sequenced to reflect the immediate, mid-term, and long term recommendations.
- **Industry Benchmark Comparison** – Compares your organization’s business processes against others in your industry. Comparative data is sourced from leading research companies.

Full Assessment Review

An assessment is of little value if it does not lead to change. A critical step in the VIP assessment process is a return visit to investigate how the implementation is proceeding. This involves re-interviewing key personnel, examining the implementation timeline, and adjusting recommendations if needed. VIP wants to partner with your organization for the long term, not just a point in time assessment.

Customized for your organization

The business world is constantly changing, so the way we conduct business must also be constantly evaluated and adapted to survive. VIP can assist by building a customized assessment plan that is targeted to your business needs. Whether the assessment need is for a single department, or a corporate wide initiative, VIP can find the optimal solution for your organization.
